Reprocessed S5p CH4 orbit list

12 March 2019

Following the official release of the Copernicus Sentinel–5P Methane (CH4) data announced on 1st March 2019 (https://sentinel.esa.int/web/sentinel/missions/sentinel-5p/news/-/article/copernicus-sentinel-5p-ch4 offl-and-o3 tcl offl-products-on-pre-operations-hub), reprocessed CH4 data products ('RPRO' tag in filename) have also now been made available on the Copernicus Sentinel-5P Pre-operations Data Hub. The products are available for selected orbits (see list below) reprocessed in the frame of the Validation campaign performed prior to the public CH4 data release. The processor version of this RPRO data is 01.02.02, the same version used for the operational CH4 products production.
